Report of School Board

TO THE CITIZENS OF MADISON:

In compliance with the law and the usual custom, we hereby submit for your consideration the following descriptive, statistical and financial report of the Madison school district for the year ending February 15, 1917. As a part of our report is included that of the superintendent of schools.

School Board	Term expires
Edna A. Gilman,	1917
Ernest E. Kennett,	1918
*Dr. W. G. Martin,	1919

ORGANIZATION

<i>Chairman,</i>	Edna A. Gilman
<i>Financial Secretary,</i>	Edna A. Gilman
<i>Secretary,</i>	Supt. Alonzo J. Knowlton
<i>Treasurer,</i>	Sidney Gilman
*Deceased.	

REPORT OF SUPERINTENDENT OF SCHOOLS.

MRS. CHAIRMAN AND MEMBER OF THE SCHOOL BOARD:

I have the honor and pleasure to submit for your consideration my fifth annual report of the schools of Madison, it being the eighth in the series of such reports.

The New State Program of Studies which was adopted has been followed as closely as is consistent with a change from the old to the new. The complete

transfer will require about two years. The work of domestic arts, manual training and agriculture outlined in it have not been attempted for want of funds.

The standard tests begun last year have been continued. Some of the findings will be reported later. A full survey of the school conditions in the district has been made.

VACCINATION

All school children enrolled in town, have presented certificates from physicians that they have been vaccinated, or were not fit subjects for vaccination, or had submitted to the process three times or had had the small pox.

The enforcement of the vaccination law caused quite a good many absences at the beginning of the school year. Those children who are to enter next fall for the first time should be vaccinated early enough in the summer so as not to interfere with school attendance.

TRANSPORTATION

The only pupils transported this year are the two little girls from East Madison to the Nickerson school and the four from the Tasker district to Conway.

EYE AND EAR TEST

School children in the district have been tested as to sight and hearing with the following results: number tested 54; number found with defective eyes 16 or 31.4 per cent.; number found with defective hearing 9 or 16.6 per cent. Eight cases of defective eyesight and nine cases of defective hearing were serious enough for me to call the parent's attention to the fact. It is hoped that those parents will be sufficiently interested

to have the children examined by a specialist to see if some remedy can be prescribed. A child with either sight or hearing defective is handicapped in his school work. The school with the largest number of defectives is the one at the Corner.

REGISTRATION												Total by grades	
GRADE	6	7	8	9	10	11	12	13	14	15	16		
I	2	3	3									8	
II		6	1	2								9	
III			7	1	1		1					10	
IV				9	5	4		1				19	
V				2	2	1	1					6	
VI						6	3	4		1		14	
VII							2			1		3	
VIII							2	1	4	2	1	10	
	2	9	11	14	8	11	9	6	4	4	1		78

The above is corrected to October 1, 1916, and shows the number of pupils in each grade at the differ-

ent ages; the total number in all grades; the number at the same age in school; the number at age or where they belong chronologically; the number of precocious or those in advance of where their age would naturally place them; and the number of retarded or backward children. There are 22 or 28.4 per cent. over age or retarded pupils; 4 or 5.1 per cent. precocious children; and 52 or 66.5 per cent. who are at age.

The diagram becomes clear when it is read as follows: In the first grade there are two pupils six years old, three who are seven years old (these are at age being between the two broken diagonal lines); three who are eight years old or one year retarded, and a total of eight children in the first grade; in the fifth grade, we read that there are two pupils nine years of age, or one year in advance of where they would be according to their age—precocious; in the third grade we read that one child is 12 years old or three years retarded; and from the totals by years, we read that there are two pupils in school who are six years old, nine who are seven years old, etc.

ATTENDANCE BY SCHOOLS

School	Teacher	Different pupils registered	Aggregate for 23 weeks of school year 1916-1917	
			No. days lost	No. tardy
Conner	Florence L. Hemenway	31	219	149
Lake	Edith G. Ginn	18	160	295
	Anna R. Ross			
Mason	Lena S. Herrick	16	299.5	69
Nickerson	Dorothy M. Moore	13	105	32
Total,		78	783.5	525

The tardy marks are excessive. It means an average of nearly seven marks for each child. The registers show that the marks are caused largely by three or four families. The teachers have used all means except the law to reduce the number. We are informed by the State Department that tardy marks, in the eye of the law, is the same as absence and the parents can be prosecuted for not sending the children to school on time. We hope that in the future there will be no occasion to complain about tardinesses for all parents wish their children to get the most out of the schools maintained with their money and for their good.

Attention is also called to the amount of time lost. The loss is exclusive of holidays. It averages more than two weeks for each child,—nearly one-tenth of the time of the school.

Some parents say that the absences are due in part to inclement weather. This is probably true and the balance is due to sickness, the most of which comes in the cold winter weather. Why not attempt to solve this problem, in a measure at least, by beginning the schools earlier in the fall—the first of August—and closing as we now do the last of June or the first days of July? The school buildings are now screened so that the children will not be annoyed by flies; the roads will be in better condition; and the weather much more comfortable for the children. This arrangement would give no school from about the middle of January to the first of April—the period when the greatest number of absences occurs. Is it not worth trying?

TESTS

The modified Rice's English test was given with the following results: Average for the supervisory district, 30.67 per cent.; Madison, 31.12 per cent.; Lake

school, 23.21 per cent.; Nickerson school, 33.33 per cent.; Corner school, 36.66 per cent.; Mason school, 50 per cent. All tests were given and corrected by the superintendent of schools and so have the same general marking whether high or low.

The Ayre's standard spelling test was given in October and again in May with the following results: Lake school, October, 81.76 per cent., May 96 per cent., gain, 14.24 per cent.; Nickerson school, October, 82.8 per cent., May 90.54 per cent., gain, 7.74 per cent.; Mason school, October, 98.18 per cent., May, 100 per cent., gain, 1.82 per cent.; Corner school, October, 96.15 per cent., May 90.5 per cent., loss, 5.65 per cent.

REPAIRS

A new floor was placed in the Mason school building, underpinning repaired, new toilets were made with separate entrances for boys and girls from the school room. There remains to be done to put this building into excellent condition—a change in the lighting, change in method of heating, and more slate boards.

RECOMMENDATIONS

1. That paper towels and fixtures be purchased for all schools.
2. That water coolers be purchased for the Mason school.
3. That better toilet conditions be made for the Nickerson, Corner and Lake schools before we are compelled by the state to do so.
4. That jacketed stoves be secured for all schools.
5. That the District adopt the policy of thoroughly remodelling one school building each year.

IN MEMORIAM

During the fall term the school board lost one of its most efficient members, Dr. W. G. Martin. Dr. Martin was whole hearted and worked for the betterment of the schools. He stood for progress and was faithful in the performance of his duty.

CONCLUSION

In conclusion, I wish to express my appreciation of the hearty co-operation which teachers, pupils, school board and citizens have given me during the past year in an effort to make the schools more efficient. I hope in the next five years to see even greater advancement than in the past five.

Respectfully submitted,

ALONZO J. KNOWLTON,

Superintendent of Schools.

North Conway, N. H., Feb. 12, 1917.

STATISTICS

Number of children in town between 5 and and 16 years,	93
(Boys, 53; Girls, 40.)	
Total number registered October 30, 1916,	76
Average number of weeks in the school year,	35.75
Average daily attendance of all schools together,	70.52
Average daily absence,	8.92
Average membership,	79.44
Per cent. of attendance,	88.79
Number of pupils not absent or tardy during the year,	3
Number cases of tardiness,	291
